PROJECTS

Ticket Support System Software

📅 Nov 2016 - Dec 2016   📍 Chicago, IL

Create a Ticket Support System as a final project for Java class.

- Partner and I ended up making a beautiful GUI with JavaFX and connected the program to a database to create trouble tickets for clients.

Setting up servers

📅 May 2016 - June 2016   📍 Wheaton, IL

Responsible with team for installation of 36+ servers

- Helped install servers with Apache at the RICE campus of Illinois Tech in Wheaton.

Installing virtual machines

📅 Jan 2016 - May 2016   📍 Chicago, IL

Virtual machines for Windows and Ubuntu

- Installed as a school project using VMWare and VirtualBox

SUMMARY

I'm a young hard working student who likes to take on challenges. I love to see others in my team succeed and want to help them do so. Technology is a passion for me, and I make it my aim as a means of doing something I love for a career. That way I've never worked a day in my life.

ACHIEVEMENTS

🎓 **Making the Deans List**
Ever since starting school at Illinois Tech, I've made the Dean's list every semester.

📽 **Starting my own business**
I started this business when I was in high school as a way for me to provide funds for myself. Three years later and it's still booming.

</> **Designing my own website**
Created a professional website for class, it holds my professional resume online.
